

NIZAMUDDIN MANDEKAR

AI ENGINEER

CONTACT

Phone: +91 8879992052

Email: nizamuddin.mandekar@gmail.com

Location: Kalyan, Maharashtra, India

LINKS

LinkedIn:

linkedin.com/in/nizamuddinmandekar

GitHub: github.com/NizamuddinMandekar

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, Basic Java

AI/ML: Machine Learning, Deep Learning, NLP, Transformers, Generative AI, LLM Applications, Vector Databases

Frameworks: FastAPI, LangChain, Hugging Face, PyTorch, TensorFlow

Frontend: React, Vite, Tailwind CSS, Zustand, Framer Motion, React Router

Databases: PostgreSQL, MSSQL, Supabase, Firebase

Analytics: Power BI, Tableau

Other: GitHub, Docker, WebSockets

EDUCATION

MSc, Artificial Intelligence

B.K. Birla College, Kalyan

9.26 CGPA | 2025

BSc, Information Technology

B.K. Birla College, Kalyan

9.27 CGPA | 2023

Certifications

Deep Learning (2025), Machine Learning

(2024) - L&T EduTech

LANGUAGES

English, Marathi, Hindi, Urdu

PROFILE

AI Engineer who builds and deploys LLM-powered chatbots and machine learning applications. Skilled in Python, FastAPI, NLP, transformers, and RAG systems, with public-sector delivery experience and a published research record in AI.

WORK EXPERIENCE

AI Engineer | AutomateBuddy Technologies Pvt. Ltd.

Feb 2026 - Present

- Developed and deployed **AskAllen**, an **LLM-powered chatbot**, using RAG architecture, embeddings, and vector search to improve response accuracy and retrieval efficiency.
- Evaluated and integrated **LLM models (Qwen, LLaMA variants)** and built embedding and vector-storage pipelines in GPU environments, processing **43,000+** resumes into searchable chunks for semantic retrieval.
- Built **AI review-analytics features for FudEasy**, including a pipeline that ingests **1000+** Google reviews for sentiment analysis and an LLM-powered system that generates contextual automated replies.
- Designed **interactive Power BI dashboards tracking monthly, quarterly, and yearly sales and expenses for 2 restaurant clients**, cutting manual reporting time, and cleaned large review datasets with Pandas and NumPy for sentiment analysis.
- Deployed and optimized **AI services on Windows and Ubuntu servers**, ensuring system stability and performance.
- Built **QuizBuddy**, a **real-time multiplayer quiz platform**, with **three** synced React and TypeScript apps (Host, TV, and Player) on Firebase Firestore, featuring **6** game modes and a CRUD-managed question bank.

Jr. AI Engineer | SAAR IT Resources Pvt. Ltd.

May 2025 - Nov 2025

- Worked on WhatsApp integration using FastAPI, Meta WhatsApp Business API, and Ngrok to establish webhook communication.
- Contributed to a multilingual e-governance chatbot for the Water Supply and Sanitation Department (WSSD), built with FastAPI, React.js, and LangChain to handle citizen queries in Marathi, Hindi, and English; integrated a SQL database so citizens could track complaint and service-ticket status in real time using unique ticket IDs.
- Built a RAG pipeline (TF-IDF + Groq LLM) for context-aware responses and added Whisper (STT) and GTTS (TTS) for voice interaction.

PROJECTS

AI Image Detector (Final-Year Project)

Classifies real vs. AI-generated images with 92%+ accuracy.
